ROCK-GARDEN

FALL PLANTING AND ITS BENEFITS

¶ To grow Hardy Perennials and Old-fashioned Flowers successfully, too much stress cannot be laid on the benefits and importance of FALL PLANTING. Just as it is the proper time to plant the bulbs for spring bloom, so it is the proper time to set out Hardy Perennials and Rock-Garden Plants. They make roots during the fall and winter, establishing themselves for spring and summer blooming.

¶ Don't overlook your garden this fall! We are here with one of the best collections of Hardy Perennials and Rock-Garden Plants in the country, and offer your choice of them at reasonable prices.

¶ When we have convinced you by our service and by our plants that we know how to make a garden that is beautiful, we will not need to ask you to tell your neighbors about us,— they will ask you themselves.

OUR LOCATION

Our Nurseries are located in Palisades, N. Y., just 14 miles north of New York City, on the new Hudson Driveway, or State Road U. S. 9-W, leading directly from the Englewood, Dyckman Street, and 125th Street Ferries, about 7 miles south of the Nyack Ferry and 1 mile south of Piermont-Irvington Ferry

Bulbs for Fall Planting *and* Spring Flowering

There is nothing so lovely or more suitable for planting promiscuously in the hardy border than Spring-flowering Bulbs. If the bulbs are planted 8 inches below the surface, the foliage may be cut off after flowering, without injury to the plant. The varieties we offer are the best for this purpose and are all hardy.

So many have already discovered the charm of these glorious spring flowers that we feel any other introduction on our part entirely unnecessary. They may be used outdoors in great masses for their wonderful color-effects and delicate odor; also for cutting, or they may be forced indoors in pots and make a very lovely decorative house plant for early spring.

Tulips

SINGLE EARLY TULIPS

Artus. Splendid dark scarlet. Grows 10 inches high. Beautiful.

Chrysolora. Rich, pure yellow. Splendid in a combination bed with Artus. 10 in. high.

Buckwheat Hulls

For Winter Mulching

No other substance seems to be so practical for winter mulching. Buckwheat Hulls will not pack down like leaves or litter, but stay loose and light on top of the soil. True, the ground will freeze, but in early spring the Hulls prevent the alternate thawing and freezing that tears the tender roots of perennials and bulbs, and ruins the plants.

While the Hulls are light, they do not blow off in winter winds. The Hulls are wonderfully effective around shrubs, on beds of perennials, over lilies and spring-flowering bulbs, providing warmth and protection with sufficient ventilation so that the plants are not smothered. The Hulls have no food value, and because of the non-packing quality, do not harbor mice or other rodents.

Prices and Packing

Buckwheat Hulls are packed in burlap bags containing 50 pounds.

100 lbs.	$1 75	1000 lbs.	$14 00
300 lbs.	4 60	2000 lbs.	23 00
